## INS PRO Supports Document Management Solutions

### Interfaces with Optical Image Technology's DocFinity Software

"We are using **DocFinity** with the **INSurance PROcessing System** Interface for our paperless environment. We estimate the program will pay for itself in under three years. A recent study showed that the annual cost attributed to the upkeep of a standard size four drawer file cabinet is about \$1,500. Prior to going with **DocFinity** and the **INS PRO** Interface we had 22 fire proof cabinets that had to be maintained. This is a \$33,000 a year savings!"

- A Satisfied Customer -

**INS PRO** - an Insurance Processing System that works for You. An affordable, dependable, flexible, and Interactive Software Package to meet the needs of Property/Casualty Insurance Companies.

**DocFinity** - Proven document management solutions that optimize business performance. The **DocFinity** Suite electronically stores and manages paper documents, along with emails, forms, faxes, files, pictures, reports, Web pages, audio and video files and other electronic media. Users have immediate and secure access.

All Policy and Claim Information is stored and managed in the **INS PRO** System.

All pertinent Emails, Documents, Inspections, Appraisals, Correspondence, and Reports may be scanned, saved, and retrieved using **DocFinity**.

The **INS PRO - DocFinity Interface** assists you with Indexing Scanned Documents and provides a Policy and Claim Number Interface Link with the **DocFinity** files for immediate access to associated documents.

- \* No more searching for a paper file. \* Multiple users can view the same file simultaneously with the click of a button. \* Start saving time and money.
- \* Reduce your expense ratio immediately.
